we learnt about the soft skills and personality development etc ,.

Feel Employable Training Programme
Siddaganga Institute of Technology (Tumakuru)
Nov 2014 - Nov 2014

PROJECTS

E-ATTENDANCE
(Mini Project) present

OBJECTIVE:

The main objective of the project is to get the attendance information of an employee and to know about his punctuality and salary generation based on the attendance .

HOW DOES THE PROJECT WORK?

It is a web application where each and every employee should connect to a local network and login to his account provided by the web page. He has to be there within a particular time and he should mark that in his profile . His account will be provided with the information regarding his current attendance status. There will be information of month separately which is used to calculate monthly salary. There will be an administrator who will add the employee details initially and he will be having access to get all the details of the employees. Late entry can be considered only if there is any genuine reason and that particular marking can be done only by the administrator . He can remove the account if necessary.

By this project we are providing an alternative way of maintaining attendance. We are trying to overcome the earlier methods of going to a particular place and writing names in a book.

SKILLS

Arduino (Intermediate)	Algorithms (Intermediate)
Data structures (Intermediate)	C Programming (Intermediate)
C++ Programming (Intermediate)	JAVA (Intermediate)
UNIX (Intermediate)	MS Office (Intermediate)
HTML (Intermediate)	WEKA
